Welcome to Crowdr! Your solution to long waits and frustration. Crowdr aims to cut down wait times by providing you with live data crowdsourced from people at your destination.

How to ask for feedback:

1. Text **(855) 265-1514** a location name: "Blarneys?" at a certain time (let's say it's 1AM)

2. Crowdr pulls responses from the database about whether Blarneys at that 1AM is crowded. The database has averaged all data about how crowded Blarney's is at 1AM.

3. Crowdr sends the asker back a response indicating that it is indeed very crowded at Blarney's at 1AM.

4. Voila! You can now try Smokes instead.

How to contribute feedback:

1. Text **(855) 265-1514** a location name and a yes/no response to whether it's crowded: "Blarneys yes"

2. Crowdr see's that you've contributed feedback at 1AM and will input into its database that Blarneys is crowded at 1AM. Your response is averaged out with everyone else who's contributed feedback at 1AM.
